SUMMARY

Computer Science and Engineering graduate with hands-on experience in Java, Spring Boot, Hibernate, REST API Development, Object-Oriented Programming, and Database Management (MySQL). Skilled in backend development, API testing, and building CRUD-based applications through internships and academic projects. Eager to contribute as a Java Developer.

WORK EXPERIENCE

Spordia Softech Pvt. Ltd, Sangli — Intern, Computer Vision / AI

Jun 2025 - Dec 2025

- Accomplished faster and more consistent dataset annotation, as measured by reduced manual review effort across sports analytics video sets, by tagging and validating video annotations in CVAT.
- Accomplished reliable, error-free input data for model training, as measured by frame sets processed successfully through the YOLOv5 training pipeline, by developing and executing Python and OpenCV frame extraction scripts.
- Accomplished improved readiness of the object-detection model, as measured by successful contribution to YOLOv5 training cycles, by preparing and validating annotated datasets for the model training pipeline.

Happy Visitors Dot Com, Jaysingpur — Web Development Intern

Jan 2024 - Feb 2024

- Accomplished functional, reliable backend modules, as measured by successful CRUD operations across core application features, by developing backend logic using Java 8, Spring Boot, and Hibernate.
- Accomplished faster database response times, as measured by reduced SQL query execution time, by optimizing queries and refining JDBC and Hibernate database connectivity.
- Accomplished a maintainable, organized codebase, as measured by clear separation of concerns across application layers, by implementing MVC architecture throughout the project.
- Accomplished verified, bug-free API behavior, as measured by successful validation of endpoint responses prior to release, by testing and debugging REST APIs using Postman.

PROJECTS

Student Management System (Java Developer Project)

Java | Spring Boot | Hibernate | MySQL

- Accomplished efficient database management, as measured by successful CRUD operations across all core records, by implementing Hibernate ORM for database operations.
- Accomplished organized, maintainable backend architecture, as measured by clean separation between layers, by implementing layered architecture following MVC principles.
- Accomplished a fully deployed working application, as measured by successful hosting and dynamic form handling, by deploying the application on Apache Tomcat with database integration.

Task Management System (Java Developer Project)

Java | Spring Boot | MySQL

- Accomplished a functional role-based access system, as measured by successful task creation, assignment, and tracking, by developing a role-based task management application in Java and Spring Boot.
- Accomplished improved team efficiency, as measured by simplified tracking of tasks, tickets, and employee assignments, by designing a relational database schema in MySQL.
- Accomplished validated API functionality, as measured by successful endpoint test coverage, by testing REST APIs using Postman.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering

2021 - 2025

Sharad Institute of Technology College of Engineering, Ichalkaranji | CGPA: 7.05

Higher Secondary Certificate (HSC), Navajeevan Jr. College, Jaysingpur

2021 | 62.17%

Secondary School Certificate (SSC), Navajeevan High School, Jaysingpur

2019 | 60.80%

SKILLS

Technical Skills: Java 8, Spring Boot, Hibernate, JDBC, MySQL, Servlet, HTML, CSS, REST API Development, Object-Oriented Programming (OOP), MVC Architecture, CRUD Application Development, API Testing

Developer Tools: VS Code, Eclipse, Android Studio, Postman, CVAT
